

SO WHAT DO WE DO NOW?

#1 Call Safe Ship at 866-804-6622 and ask every question you can think of. You must be comfortable with our ability to help and our knowledge of the business. Are they honest, helpful, respectful? Can they answer my questions? Do I trust them. Yes, we will be asking you questions and working to acquire the same comfortable relationship with you. We will be forming a team that will work together for our mutual success.

#2 Check your finances. What is my budget? How much debt do I have? I know it will take a couple of months before the store becomes profitable, so how long can I go without an income coming in as I start my store? Will I need to borrow money? Yes, Safe Ship can help you with this.

Ready to go? The franchise fee is due at this time.

#3 Safe Ship will provide you with a booklet that will help you scope out two or three areas where you would like to put a store. This is a training time for you to learn about your potential customers and know how to service them properly. You will pick potential locations and take a survey of each area.

#4 Safe Ship will visit each of your potential locations with you and together we will decide which location is best for your store. We will even negotiate your lease to get the best lease rates possible. The store fee is due at this time.

#5 We set your schedule for your training and the opening of your store. Our preference is to do one week training in our corporate store in Florida and then open your store the following week. We will work with you the first week you are open to train you as well. We will also help you promote your store locally to other businesses in your area.

We will work this together for your success.
